

Grade 7 & 8

Grade 7 & 8 has had a very busy year so far!

We began in September by going on a Spiritual Retreat to Lakewood

Christian Campground, in which we studied Spiritual Gifts. This topic continues to resonate in our classroom as the students aim to use their God given gifts to help our school and the community in which we live.

In our health class we have been studying about what makes us who we are. The students were encouraged to create a project that demonstrates their understanding and insight into who they are. This is Michelle's Project.

As part of our Literature Unit this first term in which we studied short stories, the students were asked to create a project which demonstrated an understanding of themes that were discussed throughout the different stories. Most of these themes centered on decisions. Below is Mark's project.

Here is part of a short story writing by Mike:

Today was Tuesday, Phys. Ed day. Bean never wanted to participate in these activities because he always seemed to get picked on and made fun of because he wasn't that good at any sports. Today they were going to basketball. Bean hated this because it was the sport that Scott was best at. He was the one who made fun of Bean the most, because he was good and he was captain of the Massachusetts Middle School basketball team.
